Weave in all your loose ends.

Sewing:

Fold the middle of your bowtie in to a zig zag shape and using a strand of yarn, stitch back and forth through it: don't fasten off! Go ahead and use your tail to sew the bowtie to the middle of the strap.

Make sure it is secure and will not pull loose. Fasten off and weave in the tail.

Stitch your button on to the end of your strap that DOES NOT have the button hole, and make sure to sew it on the front side of the strap so when you curve it around it will be on the right side to button through the hole! Fasten off and your done!

Congratulations! Now go show off your glorious pasta tie to all your friends! And always remember to stay bold!
